

WAVERTON MPS ON PLATFORM - GROWTH 31 MARCH 2024

Portfolio objective

The Waverton Growth Portfolio is intended for investors with a high attitude to risk and a minimum time horizon of 7 years. The portfolio seeks a longer-term return of 3.5% above inflation measured by the UK Consumer Price Index (CPI).

Portfolio overview

The portfolio seeks to provide a diversified interest in a variety of asset classes and the realistic prospect of capital growth and income over the longer term within acceptable risk parameters. Importantly, we expect little correlation between equities, bonds and selected alternative asset classes so the portfolio should provide some degree of protection during periods of equity market weakness.

The portfolio is invested through a mix of four specialist Waverton funds: Sterling Bond Fund, Strategic Equity Fund, Real Assets Fund and Absolute Return Fund.

Portfolio facts

Investment manager	Waverton
Total cost*	0.63%
Estimated yield	1.60%

Commentary

The first quarter of 2024 was a positive one for the portfolios with returns from 1.9% to 8.8%.

Bond markets stabilised during March after a weak start to the year. Sterling bond markets were relatively strong compared to other developed economy bond markets as investors saw the UK as a weaker economy and relative interest rates declined, especially versus the US. The resilience of the US economy has led to some doubts about the timing and extent of interest rate cuts by the US Federal Reserve, but the UK economy continues to look more vulnerable. This was very much in line with our thoughts this year.

In absolute terms, the strongest regional performance for the Waverton Strategic Equity Fund (WSEF) came from Japan and North America, although on a relative basis it was our Japanese equities which helped to offset weaker relative performance in the other regions. By Sector, Industrials (+20.9%), Consumer Discretionary (+14.4%) and Information Technology (+11.9%) contributed the largest positive performance in absolute terms for WSEF.

We have been adding new ideas in the Industrials sector over the last few months. Industrials as a sector had been somewhat unloved by the market until relatively recently on fears of a construction slowdown and weak PMI data. As a result, we were able to identify a number of high quality (and improving quality) businesses which were trading at attractive valuations.

A positive first quarter for the Waverton Absolute Return Fund, returning 2.1% over the first three months of 2024. This compares with +3.7% for the MSCI UK All Cap, +9.2% for the MSCI ACWI, -1.9% for UK Gilts, -1.7% for Global Bonds and +1.3% for our benchmark 3m UK cash over the quarter to end March 2024.

Over the quarter, the aggregate exposure to absolute return strategies, specialist fixed income and structured opportunities all contributed positively to returns.

The Waverton Real Assets Fund returned -2.6% over the first quarter year. Disappointing at a headline level, but it was January and February where performance was weak, while March saw an improvement in fortunes with a 2.6% gain. Hopefully signalling what may come over the remainder of 2024. In our view, the outlook continues to look attractive for Real Assets and our underlying holdings. We have updated a number of our forward looking returns measures which indicate the Real Assets Fund looks well positioned and able to deliver a double-digit returns profile on a medium term view.
